Bekzod Mirzaahmedov

FullStack Developer, Typescript , React/Next, Golang
Tashkent, Uzbekistan

Summary

With 3+ years of experience under my belt, I'm a Full-Stack Web Developer who thrives on creating beautiful and functional user interfaces (UIs) using React, Next.js, and a toolbox of UI component libraries like TailwindCSS and DaisyUI. I bridge the front-end and back-end seamlessly, leveraging Redux Toolkit, React Query, and Zod for state management, data fetching, and robust validation. My back-end expertise spans across various databases like SQLite and PostgreSQL, with the ability to utilize Object-Relational Mapping (ORM) tools like Mongoose or Drizzle. I'm also proficient in server-side development using Golang and comfortable deploying applications on cloud platforms like AWS and AWS E2C. Beyond the technical skills, I bring a passion for crafting user-centric web experiences and a continuous learning mindset to stay ahead of the curve in the ever-evolving web development landscape.
